Brian Cheung   HW 10

Github – used for collaborating and viewing code

       Pro: You can see commit history and other branches people are working on

       Con: Merge conflicts and git pull/push issues are a pain

Slack – great tool for communication within the team

       Pro: Keeps everyone updated and up to speed with where the team is

       Con: You don't know if someone seen a message or not

Paper – we mainly drew Mockups and discussed usability

       Pro: Very versatile, physical copy, and great for presentations

       Con: Transferring it to digital requires a bit more time
