Brian Cheung   HW 9

Sept 5th

- Product team slack recreated and future plans and requirements were set

Oct 7th

- Decided on a mini git hub project and began drawing up designs

Oct 14th

- Modify designs based on feedback from other teams

- Uploaded all designs to Github

Oct 28th

- Finished all design mock ups and sent them to front end

- Asked other teams for user feedback and other needs

Nov 18th

- Put together a bulldog design for the logo. We decided to put the bulldog inside a bucket to represented Bulldog buckets which would be the name of the final project

- At this point we finished

Nov 25th

- Finished all designs problems

- Started to create user stories for presentations
